

We recently got an XM satellite radio. We did this because in our area radio reception is very poor and we have access to limited station availability. With XM Satellite radio we no longer feel isolated. We have access to 100's of stations and thoroughly enjoy the choice that we now have in listening to the radio. We also like the fact, that while travelling we can listen to static free radio.

I would urge you to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that we now have access to.

Thank you
Norzetta Thiessen
